بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:1

(Marks:1)

Vu-Topper RM

SRS is prepared in _____ phase of SDLC.

- A. Design phase
- B. Testing Phase
- C. Evaluation Phase
- D. Requirement Phase**

Question No:2

(Marks:1)

Vu-Topper RM

"Modeling" helps us in _____.

- A. Visualization
- B. Communication with customer
- C. Reduction of complexity
- D. All of the given options**

Question No:3

(Marks:1)

Vu-Topper RM

One of component of Use case diagram is:

- A. Pre-Condition
- B. Alternate Path
- C. Actor**
- D. All of these options

Question No:4

(Marks:1)

Vu-Topper RM

Which of the following does not include flow of information or decision?

- A. Activity Diagram
- B. Sequence Diagram
- C. Use case Diagram
- D. State machine**

بري صحبت سے تھائی بہتر ہے اور تھائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:5

(Marks:1)

Vu-Topper RM

In use case diagram, the relationship between actor and usecase is called:

- A. Association**
- B. Union
- C. Interaction
- D. Intersection

Question No:6

(Marks:1)

Vu-Topper RM

Which of the following title/heading is NOT part of Detailed Use Case (Narrative form)?

- A. Actors
- B. Priority
- C. Outcome**
- D. Pre-Condition

Question No:7

(Marks:1)

Vu-Topper RM

Which of the following is not a proper use case name?

- A. BookOrder
- B. CancelOrder
- C. FlightNumber**
- D. TrackOrder

Question No:8

(Marks:1)

Vu-Topper RM

Nested State Diagram is a form of_____.

- A. Constrained Relationship
- B. And Relationship
- C. Or Relationship**
- D. Exhaustive Relationship

بري صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:9

(Marks:1)

Vu-Topper RM

Initial state, in state machine modeling is represented by:

- A. Black filled circle**
- B. Dotted filled circle
- C. Blank Circle
- D. None of the given options

Question No:10

(Marks:1)

Vu-Topper RM

Which of the following is/are NOT the "Cognitive Requirement Elicitation" technique(s)?

- A. Laddering only
- B. Card Sorting only
- C. Contextual Grids**
- D. Both laddering and Card Sorting

Question No:11

(Marks:1)

Vu-Topper RM

In context of contextual elicitation techniques, another name for "Observation" is:

- A. Social analysis**
- B. Domain analysis
- C. System analysis
- D. Dual analysis

Question No:12

(Marks:1)

Vu-Topper RM

The techniques that collect requirements in context of the user are called:

- A. Contextual techniques**
- B. Conventional techniques
- C. Hybrid techniques
- D. Domain techniques

برى صحبت سے تتهائى بهتر هے اور تتهائى سے نيك صحبت بهتر هے

For More Help Contact What's app 03224021365

Question No:13

(Marks:1)

Vu-Topper RM

Which of the following is NOT requirements elicitation technique?

- A. Interview
- B. Questionnaire
- C. Brainstorming
- D. Normalization**

Question No:14

(Marks:1)

Vu-Topper RM

In content of requirements elicitation techniques. "JAD" stands for:

- A. Joint Application Development**
- B. Just Application Development
- C. Joint Application Deployment
- D. Just Application Deployment

Question No:15

(Marks:1)

Vu-Topper RM

A state, in State machine modeling is represented by _____.

- A. Square
- B. Rectangle
- C. Oval
- D. Round Cornered Rectangle**

Question No:16

(Marks:1)

Vu-Topper RM

Which of the following is NOT an example of Non-Functional requirements?

- A. System should be highly useable
- B. System should be highly available
- C. System should be easily modifiable
- D. System should generate report twice a month**

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:17

(Marks:1)

Vu-Topper RM

Which of following is not characteristic of a requirement?

- A. Valid
- B. Traceable
- C. Portable**
- D. Feasible

Question No:18

(Marks:1)

Vu-Topper RM

The goal of reading SRS document by the software developer is to

_____.

- A. Manage budget of project
- B. Finalize SRS
- C. To ensure that the software fulfills the customer requirements**
- D. None of the given options

Question No:19

(Marks:1)

Vu-Topper RM

A requirement is verifiable if :

- A. It can be traced backed
- B. It can be tested**
- C. It has single meaning
- D. It is consistent

Question No:20

(Marks:1)

Vu-Topper RM

Which of the following is not type of requirement?

- A. Domain Requirement
- B. Implicit Requirement**
- C. Inverse Requirement
- D. Functional Requirement

بري صحبت سے تھائی بہتر ہے اور تھائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:21

(Marks:1)

Vu-Topper RM

In the statement:

"Ali schedules flight"

Ali is _____

A. Use case

B. Actor

C. Model

D. Relation

Question No:22

(Marks:1)

Vu-Topper RM

Use case diagram is a:

A. Entity

B. Specific System

C. Subsystem

D. Model

Question No:23

(Marks:1)

Vu-Topper RM

A _____ is set of diagrams, each of which focuses on a different aspect of the user's needs.

A. Plan

B. Requirement model

C. A simple model

D. System document

Question No:24

(Marks:1)

Vu-Topper RM

_____ is responsible for the flow of work and information between activities performed by users and system or its parts.

A. Finite State Machine diagram

B. Sequence diagram

بري صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

C. Activity diagram

D. Use case diagram

Question No:25

(Marks:1)

Vu-Topper RM

In context of UseCase diagram, association between an actor and usecase is represented by a/an:

A. Line

B. Rectangle

C. Human like Symbol

D. Oval

Question No:26

(Marks:1)

Vu-Topper RM

Use cases should be named with a _____ specifying the objective of the actor.

A. Adjective

B. Preposition

C. Verb

D. Noun

Question No:27

(Marks:1)

Vu-Topper RM

“Server not connected” is a/an:

A. Alternative path

B. System failure

C. Assumption

D. Exception

Question No:28

(Marks:1)

Vu-Topper RM

The fourth step of use case modeling is:

A. Construct use-case model diagram

بري صحبت سے تنہائی بہتر ہے اور تنہائی سے نيك صحبت بہتر ہے

For More Help Contact What's app 03224021365

- B. Identify business actor
- C. Identify business use cases
- D. Documents business requirements

Question No:29 (Marks:1) **Vu-Topper RM**

An _____ dependency, is a generalization relationship denoting the inclusion of the behaviour described by another use case.

- A. Include**
- B. Extend
- C. Solve
- D. Verify

Question No:30 (Marks:1) **Vu-Topper RM**

The third step of use case modeling is:

- A. Identify business actor
- B. Identify business use cases
- C. Construct use-case model diagram**
- D. Documents business requirements

Question No:31 (Marks:1) **Vu-Topper RM**

There are _____ major steps for making a use case modeling.

- A. Two
- B. Three
- C. One
- D. Four**

Question No:32 (Marks:1) **Vu-Topper RM**

_____ is a requirement elicitation technique, which helps business analyst to get proper understanding of the organization before meeting the stakeholders there.

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

- A. Class Responsibility Collaboration
- B. Questionnaire
- C. Document Analysis**
- D. Joint Application Development

Question No:33

(Marks:1)

Vu-Topper RM

Which of the given is a type of contextual requirement elicitation technique?

- A. Laddering
- B. Observation**
- C. Card Sorting
- D. Interviews

Question No:34

(Marks:1)

Vu-Topper RM

Which of the following is a type of cognitive requirement elicitation technique?

- A. Brainstorming
- B. Observation
- C. Interviews
- D. Ladder**

Question No:35

(Marks:1)

Vu-Topper RM

Requirements are modifiable if any changes can be made to the requirements _____ without any changes to the existing structure and style of document.

- A. easily, contradictory and completely
- B. heterogeneously, easily and partially
- C. incomplete, inconsistent and partially
- D. easily, consistently and completely**

بري صحبت سے تھائی بہتر ہے اور تھائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:36

(Marks:1)

Vu-Topper RM

_____ describe "what the system does".

- A. Non-functional requirements
- B. Constraint requirements
- C. Subjective requirements
- D. Functional-requirements**

Question No:37

(Marks:1)

Vu-Topper RM

Benefit of the Joint Application Development (JAD) is:

- A. It is very useful in validating requirements
- B. It promotes user feedback**
- C. It helps to discover certain features of a work
- D. It doesn't need many resources to be effective

Question No:38

(Marks:1)

Vu-Topper RM

Benefit of the brainstorming is:

- A. Quality requirements in a shorter period of time has been fetch
- B. Requirements are easy to understand for stakeholders
- C. It helps in new ideas generation**
- D. It saves time

Question No:39

(Marks:1)

Vu-Topper RM

_____ is an effective requirement elicitation technique when users have a lot of experience of their own fields but have less knowledge about the other fields as well as the new system.

- A. Joint Application Development
- B. Workshops
- C. Prototyping**
- D. Introspection

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:44 (Marks:1) **Vu-Topper RM**
Requirements Elicitation is a/an _____ search.
A. Deliberate
B. Planned and Deliberate
C. Planned

Question No:45 (Marks:1) **Vu-Topper RM**
Ethnography, Observation and Protocol Analysis are _____ requirements elicitation techniques.
A. Cognitive
B. Collaborative
C. Contextual
D. Traditional

Question No:46 (Marks:1) **Vu-Topper RM**
_____ are representation of user's interaction with the system.
A. Laddering
B. Brainstorming
C. Usage Scenario
D. Card Sorting

Question No:47 (Marks:1) **Vu-Topper RM**
Card sorting, Laddering and Class Responsibility Collaboration are _____ requirements elicitation techniques.
A. Collaborative
B. Traditional
C. Contextual
D. Cognitive

بري صحبت سے تھائی بہتر ہے اور تھائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:48

(Marks:1)

Vu-Topper RM

JAD sessions are basically collaborative workshops that last for _____ and whose outcome is a proper set of user requirements.

A. 3-5 days

B. 4-7 days

C. 4-6 days

Question No:49

(Marks:1)

Vu-Topper RM

_____ and whose outcome is a proper set of user requirements.

A. 4-7 days

B. 3-5 days

C. 4-6 days

D. 4-5 days

Question No:50

(Marks:1)

Vu-Topper RM

Which of the following is a knowledge elicitation technique in which stakeholders are asked to sort cards according to domain entity names using index cards or some software packages?

A. Card Sorting

B. Ethnography

C. Group elicitation

D. Brainstorming

Question No:51

(Marks:1)

Vu-Topper RM

Drawback of the brainstorming is:

A. It does not help to discover certain features of a work

B. Quantity of ideas doesn't always equal their quality

C. It is too long and tiring technique

D. It is not suitable for all types of projects

بري صحبت سے تھائی بہتر ہے اور تھائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:52

(Marks:1)

Vu-Topper RM

_____ is not an elicitation technique.

A. Presentation

B. Observation

C. Joint Application

D. Development

Question No:53

(Marks:1)

Vu-Topper RM

In _____ type of interviews, there is a pre-set agenda.

A. Structured

B. Unstructured

C. Semi-Structured

D. Both structured and unstructured

Question No:54

(Marks:1)

Vu-Topper RM

Which of the following is not part of requirement elicitation process

A. Discovering requirements

B. Removing functional requirements

C. Documenting requirements

D. Reviewing requirements

Question No:55

(Marks:1)

Vu-Topper RM

One benefit of the observation is:

A. It is very useful in validating requirements

B. It doesn't need many resources to be effective

C. It helps to discover certain features of a work

D. Authentic and reliable information provided by analyst

بري صحبت سے تھائی بہتر ہے اور تھائی سے نيك صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:56

(Marks:1)

Vu-Topper RM

_____ is an iterative process which saves development time and cost.

- A. JAD
- B. Prototyping**
- C. Observation
- D. Ethnography

Question No:57

(Marks:1)

Vu-Topper RM

Main concern(s) of requirements elicitation is/are to

_____.

- A. Identify stakeholders
- B. Identify stakeholders and Understand the problem
- C. Identify stakeholders, Understand the problem and Understand Application Domain**
- D. Understand the problem and Understand Application Domain

Question No:58

(Marks:1)

Vu-Topper RM

_____ is a requirements elicitation technique that an expert usually uses to study domain information thoroughly for the purpose of adopting when existing system needs to be replaced.

- A. Class Responsibility Collaboration
- B. Joint Application Development
- C. Questionnaire
- D. Document Analysis**

Question No:59

(Marks:1)

Vu-Topper RM

Prototyping, Brainstorming and Joint Application Development are _____ requirements elicitation techniques.

- A. Traditional

بري صحبت سے تنہائی بہتر ہے اور تنہائی سے نيك صحبت بہتر ہے

For More Help Contact What's app 03224021365

B. Collaborative

C. Contextual

D. Cognitive

Question No:60

(Marks:1)

Vu-Topper RM

"Librarian Updates Catalogue". From above statement, _____ is use case.

A. Both a and b

B. Librarian

C. Catalogue

D. Update Catalogue

Question No:61

(Marks:1)

Vu-Topper RM

_____ is an interviewing technique to elicit stakeholder's goals, standards and attributes.

A. Usage Scenario

B. Brainstorming

C. Card Sorting

D. Laddering

Question No:62

(Marks:1)

Vu-Topper RM

A drawback of the observation is:

A. It does not help to discover certain features of a work

B. It is time consuming

C. It doesn't need many resources to be effective

D. It is an expensive method

Question No:63

(Marks:1)

Vu-Topper RM

_____ is one of the dependency relations in use case diagram.

بري صحبت سے تھائی بہتر ہے اور تھائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

- A. Solves
- B. Verifies
- C. Indicate
- D. Extends**

Question No:64

(Marks:1)

Vu-Topper RM

In use case diagram, a human like symbol represents:

- A. Use case
- B. Actor**
- C. System boundary
- D. Model

Question No:65

(Marks:1)

Vu-Topper RM

Which of the following is used in combination with other elicitation techniques like interviews and questionnaires?

- A. Contextual Techniques**
- B. Observation
- C. Ethnography
- D. Brainstorming

Question No:66

(Marks:1)

Vu-Topper RM

"Place order" is a:

- A. Use case**
- B. Relation
- C. Actor
- D. Model

Question No:67

(Marks:1)

Vu-Topper RM

_____ is a process of obtaining comprehensive understanding of stakeholder's requirements.

بري صحبت سے تھائی بہتر ہے اور تھائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

- A. Requirements Analysis
- B. Requirements Elicitation**
- C. Requirements Validation
- D. Requirements Management

Question No:68

(Marks:1)

Vu-Topper RM

Use case diagram does not specify:

- A. What tasks, a system performs
- B. Who will run the test case**
- C. Which user interacts with which use case
- D. Who uses the system

Question No:69

(Marks:1)

Vu-Topper RM

_____ is a requirement elicitation technique in which no face to face interaction occurs with the users and stakeholders.

- A. Joint Application Development
- B. Class Responsibility Collaboration
- C. Questionnaire**
- D. Document Analysis

Question No:70

(Marks:1)

Vu-Topper RM

Interviews, Questionnaires and Document Analysis are _____ requirements elicitation techniques.

- A. Contextual
- B. Cognitive
- C. Collaborative
- D. Traditional**

بري صحبت سے تھائی بہتر ہے اور تھائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:71

(Marks:1)

Vu-Topper RM

_____ requirement relates to as a whole characteristic of a system.

- A. Non- Functional**
- B. Functional
- C. Inverse
- D. Domain

Question No:72

(Marks:1)

Vu-Topper RM

_____ requirements must be complete and consistent.

- A. domain
- B. inverse
- C. Functional**
- D. Non- Functiona

Question No:73

(Marks:1)

Vu-Topper RM

_____ is the ability to describe and flow the life of requirements in forward and backward direction.

- A. Validity
- B. Reusability
- C. Modifiability
- D. Traceability**

Question No:74

(Marks:1)

Vu-Topper RM

_____ is a process which ensures that the ending software product will meet the user expectations.

- A. Negotiation and discussion
- B. Requirements analysis
- C. Requirement engineering**
- D. Requirements gathering

بري صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:75

(Marks:1)

Vu-Topper RM

_____ requirement refers to a statement of a user's need that can be implemented within the given constraints and resources.

- A. valid
- B. Consistent
- C. Feasible**
- D. Unambiguous

Question No:76

(Marks:1)

Vu-Topper RM

Requirement Engineering deals with _____ process.

- A. Software Requirements**
- B. Software Maintenance
- C. Software Design
- D. Software Testing

Question No:77

(Marks:1)

Vu-Topper RM

Domain requirements can be _____.

- A. Functional
- B. Non-Functional
- C. Both functional and non-functional**
- D. Inverse

Question No:78

(Marks:1)

Vu-Topper RM

Which statement does not fulfill on the definition of a requirement?

- A. A description of how a system should behave.
- B. A description of a system property
- C. A constraint on the development process.
- D. A specification of what should not be implemented.**

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:79

(Marks:1)

Vu-Topper RM

_____ requirement has only one interpretation.

- A. Consistent
- B. Unambiguous**
- C. Correct
- D. Valid

Question No:80

(Marks:1)

Vu-Topper RM

Fixing error cost at requirements stage is _____ than fixing it at later stages.

- A. High
- B. Less**
- C. Equal
- D. Very High

Question No:81

(Marks:1)

Vu-Topper RM

Quality factors, design criteria and metrics are supposed to be considered as _____ requirements.

- A. Domain
- B. Inverse
- C. Functional
- D. Non-Functional**

Question No:82

(Marks:1)

Vu-Topper RM

Requirement Engineering is a new area started in _____.

- A. 2010
- B. 2000
- C. 2005
- D. 1993**

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:83

(Marks:1)

Vu-Topper RM

Requirement engineering is not a process of _____ requirements in the engineering design process.

- A. Defining
- B. Documenting
- C. Maintaining
- D. Removing**

Question No:84

(Marks:1)

Vu-Topper RM

The requirements that come from application domain are called:

- A. User specific requirements
- B. Non-functional requirements
- C. System requirements
- D. Domain requirements**

Question No:85

(Marks:1)

Vu-Topper RM

If a requirement does not conflict with other requirements then it is called _____ requirement

- A. Verifiable
- B. Redundant
- C. Consistent**
- D. Feasible

Question No:86

(Marks:1)

Vu-Topper RM

Which is not a characteristic of a Good Requirement?

- A. Feasible
- B. Unambiguous
- C. Traceable
- D. Inconsistent**

بري صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:87

(Marks:1)

Vu-Topper RM

Output of the requirement task is:

- A. Precise statement of what system will do**
- B. Precise behavior of system at runtime
- C. Precise method for system granularity
- D. Precise model for system structure

Question No:88

(Marks:1)

Vu-Topper RM

A requirement defines:

- A. A method for system maintenance
- B. A model to predict the abnormal behavior of system
- C. A plan to schedule system resources
- D. A statement of system service or constrain**

Question No:89

(Marks:1)

Vu-Topper RM

Which of the following is NOT an example of non-functional requirement?

- A. System will display total of expenditures**
- B. System will be easy to use
- C. System will always be available
- D. System will be easy to modify

Question No:90

(Marks:1)

Vu-Topper RM

A choice of requirement engineering process for the development of system requirements depends on _____.

- A. People involved and organization developing the application
- B. Application domain and People involved
- C. Application domain, organization developing the application and just client involvement

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

D. Application domain, People involved and organization developing the application

Question No:91

(Marks:1)

Vu-Topper RM

Which of the following is related to a non-functional requirement of the system?

- A. Buy Ticket
- B. Book Seat
- C. Security**
- D. System Login

Question No:92

(Marks:1)

Vu-Topper RM

Which of the following is not an example of non-functional requirement?

- A. System Login**
- B. Verifiability
- C. Maintainability
- D. Availability

Question No:93

(Marks:1)

Vu-Topper RM

This is not a good practice to use _____, when writing software requirements.

- A. nice to have**
- B. must
- C. could
- D. should

Question No:94

(Marks:1)

Vu-Topper RM

_____ defines capability needed by a user to achieve an objective.

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

- A. Specification
- B. Requirement**
- C. Vision
- D. Need

Question No:95

(Marks:1)

Vu-Topper RM

_____ requirement is also termed as testable requirement.

- A. Verifiable**
- B. Modifiable
- C. Traceable
- D. Validated

Question No:96

(Marks:1)

Vu-Topper RM

System will show all transactions from specified start date to specified end date”.The above given statement is example of:

- A. Constraint requirement
- B. Non-functional requirement
- C. Subjective requirement
- D. Functional-requirement**

Question No:97

(Marks:1)

Vu-Topper RM

Requirements that describe “what system will not do” are called:

- A. Non-functional requirements
- B. Inverse requirements
- C. Reverse requirements**
- D. In-bound requirements

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:98

(Marks:1)

Vu-Topper RM

To ensure the _____ of a requirement, the related requirement(s) should be reviewed with the key stakeholders.

- A. Inconsistency
- B. Ambiguity
- C. Traceability
- D. Validity**

Question No:99

(Marks:1)

Vu-Topper RM

Requirement Engineering is a branch of _____.

- A. Software Verification and Validation
- B. Software Project Management
- C. Software Quality Engineering
- D. Software Engineering**

Question No:100

(Marks:1)

Vu-Topper RM

A well written requirement is an excellent _____ of measuring project quality and progress.

- A. Script
- B. Source**
- C. Sink
- D. Service

Question No:101

(Marks:1)

Vu-Topper RM

A requirement is feasible if:

- A. It is implementable within the given constraints**
- B. It can be represented with a model
- C. It can be extracted from user
- D. Objects can be extracted from it

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے

For More Help Contact What's app 03224021365

Question No:102

(Marks:1)

Vu-Topper RM

Requirements are modifiable if any changes can be made to the requirements _____ without any changes to the existing structure and style of document.

- A. heterogeneously, easily and partially
- B. easily, contradictory and completely
- C. incomplete, inconsistent and partially
- D. easily, consistently and completely**

Question No:103

(Marks:1)

Vu-Topper RM

Requirements are modifiable:

- A. If requirements can be translated into behavior
- B. If requirements can be implemented within budget
- C. If changes can be made to requirements easily**
- D. If requirements have only one interpretation

Question No:104

(Marks:1)

Vu-Topper RM

The system shall be developed using Java platform is an example of _____:

- A. Domain Requirement
- B. Non- Functional Requirement
- C. Functional Requirement
- D. Design and Implementation Constraint**

Question No:105

(Marks:1)

Vu-Topper RM

A requirement is traceable if:

- A. It is non-atomic, however unique ID is not necessary
- B. It is feasible
- C. It can be translated into use case
- D. It is atomic and has unique ID**

بري صحبت سے تہائی بہتر ہے اور تہائی سے نیک صحبت بہتر ہے
